

2 in 1 SOLAR POWERED LIGHT

HOW YOUR SOLAR POWERED LIGHT WORKS

- During the day, the solar panel converts sunlight into electrical energy and stores it in the built-in rechargeable battery.
- The battery powers the light at night, so you don't need to plug it in or change batteries.
- The light is easy to install. Just screw it into a wall or post, and it's ready to go.
- The light is made of high-quality materials and is built to last.
- The light is also very energy-efficient, so it won't cost you anything to run.

CHOOSING A LOCATION

- Choose a location that gets a lot of sunlight during the day.
- Avoid locations that are shaded by trees or buildings.
- The light should be placed at least 6 feet away from any power lines.
- The light should be placed at least 6 feet away from any water.
- The light should be placed at least 6 feet away from any flammable materials.

FIRST TIME USE

- To use the light for the first time, simply screw it into a wall or post.
- The light will automatically turn on at night and off at day.
- The light will last for up to 10 hours on a full charge.
- The light is made of high-quality materials and is built to last.
- The light is also very energy-efficient, so it won't cost you anything to run.

TROUBLESHOOTING

- If the light does not turn on at dusk, check the battery level.
- If the light does not turn on at dusk, check the solar panel.
- If the light does not turn on at dusk, check the light bulb.
- If the light does not turn on at dusk, check the wiring.
- If the light does not turn on at dusk, check the location.

INSTALLATION TIPS

- Choose a location that gets a lot of sunlight during the day.
- Avoid locations that are shaded by trees or buildings.
- The light should be placed at least 6 feet away from any power lines.
- The light should be placed at least 6 feet away from any water.
- The light should be placed at least 6 feet away from any flammable materials.
